

Our Products

The machines of SAB-SERIES are designed for operating in the automatic cycle and HP-SERIES machines are designed for operating in the semi-automatic mode. These machines are used for manufacturing bottles and jars of size 25 ml to 25 litre. capacity made from polyethylene Terephthalate (PET) preform by thermal processing and stretch blowing.

The shape and size of the final product can be achieved by simple change of mould and adequate regulation of the system for stretching and heating the preform.

Our Products Range:

Semi Automatic Machine

These machines are designed for operating in the semi automatic cycle. These machines are used for manufacturing bottles and jars of size 25ml to 25 ltr. capacity made from polyethylene Terephthalate (PET) preform by thermal processing and stretch blowing.

Auto Drops

Machines of this series are designed for operating in the semi-automatic mode. These machines are used for manufacturing bottles and jars of size 25ml to 25 ltr. capacity made from polyethylene Terephthalate (PET) preform by thermal processing and stretch blowing.

Twin Series

This series offers the biaxial orientation Stretch Blow Moulding Machine to produce Pet Bottles and Jars from 25 ml to 25 Ltr. by using pet preform.

Automatic Machine

Machines of this series are designed for operating in the automatic mode. These machines are used for manufacturing bottles and jars of size 25ml to 25 ltr. capacity made from polyethylene Terephthalate (PET) preform by thermal processing and stretch blowing.

New Products

Machines of this series are designed for operating in the semi-automatic mode. These machines are used for manufacturing bottles and jars of size 25ml to 25 ltr. capacity made from polyethylene Terephthalate (PET) preform by thermal processing and stretch blowing.

Hot Fill

Machines of this series are designed for operating in the semi-automatic mode. These machines are used for manufacturing bottles and jars of size 25ml to 25 ltr. capacity made from polyethylene Terephthalate (PET) preform by thermal processing and stretch blowing.

Country Liquor

Machines of this series are designed for operating in the semi-automatic mode. These machines are used for manufacturing bottles and jars of size 25ml to 25 ltr. capacity made from polyethylene Terephthalate (PET) preform by thermal processing and stretch blowing.

Applications

Suraj Plastic has a wide variety of blow moulds suitable for two stage PET bottle blow moulding, which has covered the fields of MINERAL WATER, SOFT DRINKS, JUICES, OIL, PHARMACEUTICALS as well as in other food and non-food applications. Our machines can ensure our customers to produce high quality PET Bottles with the most economical investment, the shortest production startup time and the lowest maintenance cost

The PET containers are used for:

- Mineral Water
- Soft Drinks (Low and High Carbonated)
- Alcoholic Beverages
- Agro-Chemicals
- Cosmetic and Pharmaceuticals
- Edible Oil
- Powder products, coffee, tea, spices and sweets.

Industries We cater:

- Beverage Industry
- Oil Industry
- Chemical and Pesticide Companies
- Food Packaging Companies
- Mineral Water Packaging Companies
